

Installation Guide for a Altitude Point Balcony Lightbulb

This guide has been created by a resident of Altitude Point. If you are unsure about any of these steps, please contact a qualified electrician. Remember to turn off the power at the fusebox before commencing any electrical work.

1. Remove the entire light from the cladding

2. Remove the 4 screws and put light surround to one side

3. Slide the plastic lid back up the cable careful of rubber seal

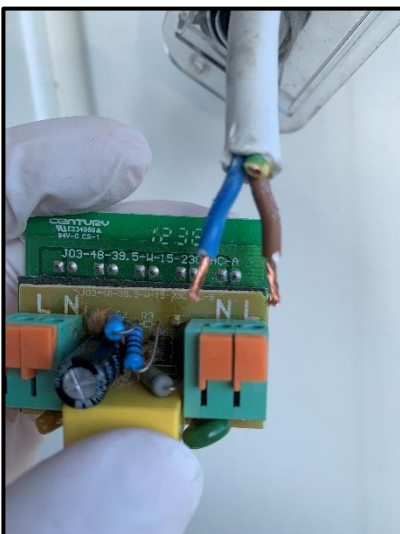

Slide lightbulb out of case being careful not to drop reflector

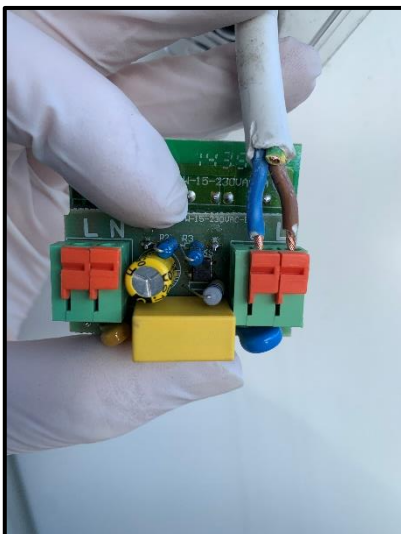

5. Put the case and reflector to one side

6. Slide clips backwards to release wires (Can be quite stiff)

7. Remove old lightbulb make a note of cable polarity

8. Fit wires into terminals of new bulb sliding back the orange clips. Gently pull cable to ensure it is secure

9. Slide over the rubber seal then fit reflector and hold in place

Installation guide for a Altitude Point Balcony Lightbulb cont'd

10. Slide bulb back into case.
Fitting circuit board into slots

Refit plastic lid making sure to
